o supplementary condition for theoretical interests. when they are freed from the necessity of living by their own exertions.

o another social factor. man's practical life depends on the labours of others
 " mental " " ideas of others - interchange of ideas
 7 tendency to imitation - sympathy + understand 2
 0 Knowledge 2

o all mental process, as such, is conative
 o Conative { elated mood — a rosy view of things (ideas corresponding)
 Depressed " — dark " (ideas slow, difficult)

due to organic condition

Pain + Pleasure (Stout) 頁 =

aesthetic pleasure - 236 unimpeded flow of activity
conditions - arrangement of parts to whole, causing to facilitate attention

near varied each giving pleasure = it better

- (a) solution of mathematical problem
- (b) an experiment
- (c) a theory
- (d) a clear, orderly style
- (e) a plot of a novel maximum excitement, minimum tension
- (f) ludicrous contrast 284
- (g) Rhythm & symmetry - facilitate mental process
- (h) concurrence of rhythm - dance & music
- (i) " " of sound & sense poetry
- (j) asymmetry

Physiological Application

- (a) the tendency of disturbed neural arrangement to equilibrium
- (b) sight & hearing, ordinary sensation & hedonic + 1 theoretically = 288-89
- (c) enhanced constitution 21, certain neural element act together in fixed order
- (d) muscular action 22, habit = hedonic + 32, 1/2, 1/2 = "2 of 1, 1/2, 1/2"
